

Item C - end of validity

If ...**TimeSlice.validTime.TimePeriod.endPosition** is NIL and ...**TimeSlice.validTime.TimePeriod.endPosition@indeterminatePosition** has the value "unknown" (the area is permanent), then insert "PERM" as item C value.

Otherwise, if ...**TimeSlice.validTime.TimePeriod.endPosition** is not NIL, then insert its value in item C formatted according to the NOTAM syntax for this field: yymmddhhmm. If the time value of endPosition is 24:00 or 24:00:00, then the value "2359" shall be used as hhmm group in item C. In addition, if ...**TimeSlice.validTime.TimePeriod.endPosition@indeterminatePosition** has the value "unknown", "before" or "after" (the Event has an estimated end of validity), then append "EST" at the end of the item C value.
