

Examples

The examples created in support of version 2.0 of the Digital NOTAM Specification are based as much as possible on the fictitious "Donlon" Data Set and are encoded as AIXM 5.1.1 Events and features. They are documented on GitHub and can be accessed using the following link: <https://github.com/aixm/donlon/tree/master/digitalNOTAM>. In addition, each scenario contains links to the appropriate examples.

Furthermore, this section provides a commented example, which explains the basics of the Digital NOTAM concept.
