## SWIM Supporting Material

This site contains draft content for the **next version** of the supporting material for the EUROCONTROL SWIM specifications. The content is mature but is still subject to review, comment and change by the [SWIM Community of Interest](#).

It is an evolution of the agreed and published content found on the [SWIM Reference](#) website.

If you are looking for the "official" versions of the supporting material, please go to the [SWIM Reference](#) website.
